DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-12,33,34 rejected under 35 U.S.C. 102(b) as being anticipated by Hill (3951411).

Hill teaches a plurality of game pieces (Fig.4-5), a game board comprising an inner play area as a grid of squares and an outer play area (2:25-32), dice (Fig.2-3) and game pieces having types (Fig.4) and attributes (3:3-6) as values defining the game pieces.

Applicant may note that limitations such as “positioning of game pieces in inner or outer areas, “second game piece moving from first to second position, the second position determining the type of game piece and game piece type determining the attribute”, “rolled numbers determining moves”, “attributes independent of circumstances” are rules for playing and do not further limit the apparatus in the claim.

As best understood from applicant's disclosure the “types” and “attributes” of game pieces are in rules for playing and not considered apparatus limitations.

Response to Arguments

3. Applicant's arguments with respect to claims 1-12,33,34 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3711

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bolan (3973775) and Brzezinski (4306724) teach similar configuration as claimed.
